ABOUT THIS COURSE

This IOSH Approved Slips, Trips and Falls Training Course is designed to give you all the information you need to effectively recognise and control the risks from slip, trip and fall hazards in your workplace.

This particular fall prevention programme is for **everyone** – employers, safety representatives and employees – because after all, **anyone can have a workplace accident**.

Taking around 30 minutes to complete, slips, trips and fall prevention training from iHASCO focuses attention on **awareness, prevention and personal responsibility**; as well as providing clear steps of how to identify and endeavour to minimise this kind of risk in a variety of work environments.

This course also looks at the steps involved in putting appropriate measures in place to help **prevent** this kind of accident occurring.

The HSE report that around **29%** of workplace injuries are due to slips, trips and falls (on same level) and falls from height accounting for **8%**. In 2018/19 there for **40 deaths** caused by falls from height.

This Slips, Trips and Falls Prevention Training Course is one of our most popular courses and can be used in conjunction with our [Spill Kit Training](#).
